Experience

Mid Level Full Stack Developer

Brewer Digital | 6/2020- present

- Assisted several companies in reducing tech debt, upgrading security, and adding features to their applications
- Consulted with clients to determine needs, draft software requirements, and communicate back to development team
- Balanced the tradeoffs of timeline, quality, and budget to ensure delivery of the best possible result to the client
- Coached, trained, and supervised associate developers to be the next mid level developers

Associate Full Stack Developer

Brewer Digital | 4/19 - 6/20

- Built mobile applications using React Native, Redux, Swift, and Kotlin
- Supported and created over 25 Ruby on Rails applications

Software Engineer

GroverDB | 1/19 - 3/19

- Built out multiple features using Angular 6, NGRX, SASS, Node.js, and SQL
- Lead by example using Agile workflow and regular pair programming
- Excelled in startup culture, regularly took on tasks outside of job description
- Implemented all API integration
- Introduced and oversaw complete UI/UX rebuild

Instructor

Galvanize | 8/18 - 2/19

- Instructed 100+ web development immersive students through a full-stack program
- Facilitated lessons on CLI, Agile Development, HTML, CSS, JavaScript, React.js, Redux, Node.js, Express.js, PostgreSQL, Knex.js, and more
- Utilized Agile methodologies with the Instructional team to effectively plan daily activities

Education

B.S. Computer Science

Western Governors University | 9/20 - 9/22

Relevant Coursework:

- Business of IT - Project Management
- Discrete Mathematics I & II
- Scripting and Programming
- Computer Architecture
- Data Structures and Algorithms

Web Development Immersive

Galvanize | 2/18 - 8/18

An immersive course that facilitates the mastery of key hard and soft skills needed to excel in the world of development. Most importantly it introduces its students to the culture of coding and the mindset of learning to learn

Skills

- | | |
|---------------------------|-----------------------|
| - Web and DB Architecture | - Ruby on Rails |
| - Server-Side Scripting | - JavaScript |
| - Security Compliance | - AWS and GCP |
| - Agile and Scrum | - Docker |
| - Mentoring | - SQL |
| - Communication | - Application Scaling |

Projects

SafetyNet

React Native, ChatKit, Javascript, Express
Node.js, Knex, PostgreSQL, BCrypt
github.com/s-romberg/safetynet

SafetyNet is a React Native app that will connect people with mental health problems to a safety net of people ready to care for them. It will guide friends, family, and volunteers alike through the process of helping someone cope in a healthy way.
